

Work Smarter, Not Harder.

Estimate and secure your patients' payment the day they visit with MMS mPay Gateway.

Time spent chasing down co-pays and deductibles from patients is on the rise. Unfortunately, you're still probably losing tens-of-thousands of dollars in revenue because on average only 50 percent of patient fees are collected once the patient walks out the door. Medical Management Systems has a solution for you with mPay Gateway. You can estimate your patient's responsibility and begin the payment process before they leave your office. Now that's working smarter.

West Michigan Physicians Network has selected this powerful new tool to help you collect patient balances and keep your accounts receivable from climbing out of control. Join us at one of the WMPN product demonstration meetings to learn more, as well as receive a free "return on investment" analysis.
